

## SNOW REMOVAL PRIORITIES

- A. Snow removal priorities shall be established by route type and use, including average daily traffic and commuter route factors.
  1. Higher priority routes shall receive greater attention.
  2. Lower priority routes may receive less attention until resources become available.
- B. A map showing priority routes in each district shall be prepared and published for public comment prior to commencement of the snow season, and a copy of the map showing priority routes will be available for public inspection at each District Office location.

- **PRIORITY ROADS**

- Legion(hospital), 8<sup>th</sup>St.(emergency vehicles),
- School right of ways
- Heavy traveled roads; 7<sup>th</sup>,Mills,Bridge st., Plaza, Hot springs, Alamo st., Douglas
- Hills sides-Creston circle., Grant st., Moreno st., Sapello st., Keen st.

- **Lower Priority roads**

- All other side streets to include public parking lots (Senior Center, City Hall, Rec Center, Transportation Dept., old Safeway, fire depts., police dept., Valencia).
- All calls that come in

## **STORM CLASSIFACATIONS**

Storm classifications are general weather condition guidelines used to identify the level of service to be performed, based on the road priority.

1. None or minor effect; no precipitation or too little or light for problems.
2. Light or localized effect; weather event which creates problems in small areas of short duration.
3. Heavy or major effect; covers most of area, moderate intensity, to 12 hours duration.
4. Heavy or major effect; covers most of area, heavy over 12 hours, blowing and drifting.
5. Severe effect; blizzard or ice storm, over 24 hours.

# STORM CHARACTERISTICS

## Severe Weather Conditions

Classification Class 4 or Class 5  
Snow above 4"- accumulating rapidly  
Snow showers heavy  
Wind blowing and drifting-above 20 mph  
Temperature sub-zero/cold wave  
Storm continuous  
Road surface snow packed, ice and drifts  
Time of day anytime  
Traffic blocked, stopped, very slow and stalling  
Visibility zero to near zero

## Major Weather Conditions

Classification Class 3 or Class 4  
Snow 2" to 4"  
Snow showers continuous flurries  
Drizzle freezing rain or sleet  
Wind gusts 10 mph or less  
Temperature 32 degrees and falling  
Road surface wet snow and/or ice  
Time of day daylight or nighttime  
Traffic slow movement  
Visibility poor

## Minor Weather Conditions

Classification Class 1 or Class 2  
Snow trace to 2"  
Snow showers spotty and intermittent  
Drizzle wet  
Wind none to breeze  
Temperature 25 degrees and above  
Road surface wet/snow  
Time of day working hours  
Traffic steady movement  
Visibility normal
