STATE OF NEW MEXICO
EMERGENCY DETERMINATION FORM

The emergency procurement method (NMSA 1978, Section 13-1-127) may only be used when there exists a threat to public health, welfare, safety or property requiring procurement under emergency conditions. The existence of the emergency condition creates an immediate and serious need for services, construction or items of tangible personal property that cannot be met through normal procurement methods and the lack of which would seriously threaten:

1. the functioning of government;
2. the preservation or protection of property; or
3. the health or safety of any person .

I. Name of Agency: **City of Las Vegas**

Agency Chief Procurement Officer: *Helen Vigil*

Telephone Number: *505-454-1401*

II. Name of Contractor: DPC

Address of Contractor:
P.O BOX 200129
HOUSTON, TX 77216

Amount of prospective contract: \$1,697.85

Term of prospective contract: 1 time purchase

III. Please thoroughly list the services (scope of work), construction or items of tangible personal property of the contract:

Salt needed for disinfection process at the Water Treatment Plant.

IV. Provide an explanation for the justification of the procurement including a description of the emergency condition(s) requiring use of emergency procurement and the practicable competition utilized in compliance with NMSA 1978, Section 13-1-127 *City of Las Vegas has Salt Works under contract but is currently unable to provide the materials requested.*

V. Please describe what measures are being taken to minimize the duration and effect of this particular emergency procurement (for example: is the emergency only in place until a competitive process can be completed, etc.).
This is extenuating circumstances due to our vendor not having any supply at this time

VI. Describe what measures the Agency will take in the future to prevent/mitigate use of an emergency procurement under similar circumstances.

City of Las Vegas will consider having 2 vendors under Contract

Thru: Maria Gilvarry, Utilities Director

Re: Emergency Purchase of Sodium Chloride Crystals from DPC

The Water Treatment Plant uses Sodium Chloride Crystals to create Sodium Hypochlorite to disinfect the finished water to meet State and Environmental Protection Safe Drinking Water requirements.

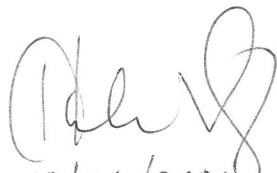

The City of Las Vegas Currently is in contract with Salt Works, However their supplier does not have product available for shipping.

Therefore, I'm requesting that the City of Las Vegas approve the emergency purchase of (3) pellets of Sodium Chloride Crystals from DPC amount of \$1,697.85

The City will have to go to DPC which is located in Albuquerque NM to pick up the three pellets. ✱

Should you require additional information, please feel free to contact me at (505) 927-9605.

Verified w/Maria Gilvarry. City will not pick up product. It will be delivered by DPC therefore City will pay for surcharge fee.

Marvin,

As discussed on the phone this morning, we were informed by Morton that they do not have product available for shipping at this time. We are still trying to push them to give us a more definite timeframe for this product. In the meantime, I have attached a PDS for the Puresun food grade salt referenced below as an alternative. Please let me know your thoughts on this.

Thanks,

Blake Walker

Hello Jesus,

I heard back from Morton, and they are checking to see if there is product availability at any of their other facilities. They informed me the availability for Culinox is very tight. There is another food grade product called Pure Sun. I have attached the product data sheet for both the Culinox and the Pure Sun for you to compare. I did check availability. Although it is tight it is not as tight as the Culinox, and I have been told by Morton they would be able to get us a full truck load of the Pure Sun sooner than the Culinox.

After you review, please let me know if you prefer to wait for the Culinox or if you would like to receive the Pure Sun instead. My understanding is we would honor the pricing you received for the Culinox on the Pure Sun. Any questions regarding the product should go to Blake.

Hi Jesus,

I just got word back from our office that they are still waiting for Morton to confirm product availability. We already have the freight lined up, ready to pull the trigger. I am hoping that we will hear from them soon and can get you an ETA. Anitra is copied on this email and is working directly with Morton on this and will let you know right away when we get the info.

Thanks,

Blake Walker

-100	<0.0059	0.1 – 11.3	2.0

Product

Tru-Flo[®] LCM Food Grade Salt is a high purity salt used in food processing and for human consumption. Total calcium and magnesium content does not exceed 30 ppm. It is a minimum 99.9% NaCl and contains virtually no insolubles. Our food grade products are uniform in crystal size, are fast dissolving, and produce clear brine. The product meets or exceeds FDA and Food Chemical Codex standards for food grade salt and is annually certified kosher.

Process

The product is made in the evaporating system from saturated brine. The salt is dried and screened for even distribution and fine blending.

Additives

Yellow Prussiate of Soda (YPS) Up to 13 ppm

Trace Elements

Iron (From Yellow Prussiate of Soda) Up to 2.4 ppm
Copper Less than 0.5 ppm
Heavy Metals as Lead: Less than 2 ppm

Bulk Density

76 - 80 lbs. per cubic foot

Package

The product is packaged in multiwall, polyethylene-lined, moisture-proof, skid resistant kraft paper bags. The product is also available in bulk.

Re: SDS for Food Grade or Agricultural Grade Products manufactured by United Salt Corporation

To Whom It May Concern:

As United Salt Corporation interprets the OSHA Hazardous Communication Standard, Food Grade and Agricultural Feed Grade products are exempt from GHS Labelling as described in the standard. These products are exempt because salt intended for food consumption is not hazardous. USC maintains that the exemption is also qualified under 1910.1200(b)(5)(iii) of the Hazard Communication Standard.

United Salt Corporation therefore is not currently supplying an SDS for food grade or feed grade salts.

Document originally issued March 1, 2016. Review date appears above.

Please contact me if additional assistance is needed.

Sincerely,
Thomas M. Ellis
Technical Manager
